ODP 83-794
2 June 1983

MEMORANDUM FOR: Deputy Director for Administration

FROM: STAT

Director of Data Processing

SUBJECT: ODP Report for Week Ending 3 June 1983

1. **Security Access Central System (SACS)**

    The Information Systems Security Group, Office of Data
Processing (ISSG/ODP), briefed the Chief, Headquarters Security
Branch (C/HSB/OS) on how the SACS minicomputer is used for
access to the [   ] Special, and Northside Computer   STAT
Centers. The ISSO/ODP has access to the Central Badge and
Credential System (CENBAD), the database source for SACS, and
is able to amend the database to add or delete access to the
centers. Also, C/HSB/OS was advised of the intended use of
SACS for the implementation of the Document Logging System
(DLS) in ODP computer centers and briefed on DLS and how it
will be used. Since it is expected that SACS will be used for
additional controls, OS is looking into upgrading the SACS
computer system.

2. **Excess Equipment**

    An excess ODP-owned PDP 11/34 computer system was
transferred to the Office of Communications (OC) to host the
Communications Equipment Monitoring System (CEMS). The system
was originally acquired, at a cost of $149,000, for use as a
Technical Analysis and Display System (TADS) graphics
workstation.

3. **Deputy Director of Central Intelligence (DDCI)**

    Mr. John McMahon (DDCI) toured the Northside Computer
Center on 27 May.

4. **Wangs for [   ] Building**   STAT
                                                                STAT

    A survey was conducted on 24 May at the [   ] Remote
Computer Facility to review the present equipment layout and
find sufficient space for the proposed installation of five
Wang Alliance Systems required to support OC. The survey
results found adequate space for the proposed equipment without
reconfiguring the current systems.

5. GIMS Users Group Hosted by ODP

Data Base Systems Branch (DBSB) hosted a meeting of the GIMS Users Group on 1 June. Personnel from the Federal Bureau of Investigation (FBI) and the Federal Aviation Administration (FAA) were in attendance. The main purpose of the meeting was to provide the FBI and the FAA with information about GIMS Software Releases 4.3 and 4.5.

6. Significant Events During Coming Week

The Northside Computer Center is scheduled to have a total site chilled water and steam outage from 1800 hours on 3 June through 2400 hours on 5 June. The outage, which will require the SAFE system to be powered off, is for a General Services Administration contract to install a new cooling tower cell at the Headquarters power plant and to install new utility lines to the north side of the Headquarters Building. DDI SAFE users have been warned of this outage.
